# THE 2016 ENGINEERING SOFTBALL CLASSIC

## TOURNAMENT RECAP

This year brought about big changes for the Engineering Softball Classic. The ESC saw its first major expansion this year with the addition of the Construction Contractor Division. Due to that expansion, and the continued participation in the Engineering Division, a larger venue was needed. St. Louis has served as a great setting for the ESC, so it was a bittersweet change, but Oak Villa provided the opportunity for growth. Finally, the move from the heat of July into a much more comfortable April made the 2016 ESC an even more enjoyable event.

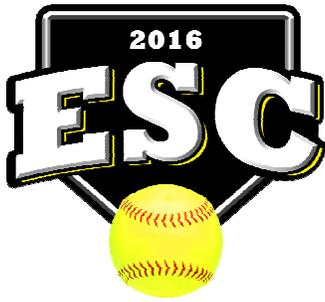

Although rain came through on Friday, the staff at Oak Villa did a great job to make sure the fields were ready for an early start on Saturday. Overcast skies and a brief mist threatened, but ultimately held out allowing the tournament to go off without any problems.

As we have seen over the past years, the level of competition continued to rise. This event has continued to become not only a great fundraiser, but also a competitive softball tournament. There were some very exciting games including quite a few come-from-behind victories. In the Engineering Division, CDI made it to their third straight championship game ultimately falling short to FB&D making FB&D the fourth different company to win the ESC in four years. In the inaugural Construction Contractor division, PALA edged out Cajun to claim the title.

The goal is to grow and expand the ESC each year. That not only includes the number of teams participating, but also the amount of money raised for St. Jude's. Due to the incredible support and participation from our sponsors and participants, we are very excited to announce that the Engineering Softball Classic has surpassed last year's amount raised for St. Jude Children's Research Hospital! While we are still waiting for a few checks to come in, we expect the total to be over **\$27,000**. This brings the total amount raised in four years to over **\$75,000**.

Thanks again to everyone who has supported the ESC and has helped make it such a great success! And a special thanks goes out to the many volunteers that helped throughout the day. Without their untiring help, the ESC could not exist.
